## PROJECTS

### DECEMBER 2022 – JANUARY 2023

#### **BACKEND DEVELOPER**, INTERN PROJECT

WORKED ON AN E COMMERCE SITE, DID THE WHOLE BACKEND USING .NET WEB API, C#, SQL SERVER AND JWT FOR AUTHENTICATION.

### MARCH 2022 – MAY 2022

#### **FULL STACK WEB DEVELOPER**, COLLEGE PROJECT

Made an E-learning website using angular and linked it to a database. Was responsible for the design and authorization and authentication also was responsible for the database linkage.

### MARCH 2022 – MAY 2022

#### **SOFTWARE ENGINEER**, COLLEGE PROJECT

Made a Pinterest like application using c++. Was responsible for database creation and management also played a part in the gui functions.

### MARCH 2022 – APRIL 2022

#### **SOFTWARE ENGINEER**, COLLEGE PROJECT

Made a news management system using c#. Was responsible for the admin side functions: posting, updating, deleting the news.

### FEBRUARY 2022- MAY 2022

#### **FULL STACK WEB DEVELOPER**, SELF PROJECT

Made a fashion site. Did both the frontend and backend on my own and they both work well and interact with each other as they should
